

J'Abode Projects Jan 16-23

We worked on three different houses for J'Abode the first week, all in the Salt Marsh area. The first was a house attached to the Faith Apostolic Assembly Church where we worshipped on Sunday. We poured a concrete floor in the living area and for the outside porch and made steps leading up to the porch area.

The second project was another house close to the church. We formed up and poured the top beams around the living area one day and poured the roof the next.

The third project was farther up into the hills, and involved laying cement block to construct the walls of a bathroom that is being added to an existing house. We are ready to install the zinc roof next week.
